

Intellect's AI-Powered Quality Management System

Elevate Quality. Automate Compliance. Accelerate Success.

Intelligent Quality Management Systems for Modern Enterprises

In today's fast-moving environments, the smallest quality issue can snowball into major disruptions—leading to delays, compliance risks, and loss of customer trust. Intellect QMS AI is an intelligent Quality Management System that empowers mid-market and enterprise organizations to elevate quality, minimize risk, and accelerate operational excellence.

Built on Business Process Management Platform (BPM)

Founded in 2000, Intellect is a leading provider of AI-powered Quality Management software designed to help mid-market and enterprise organizations improve product quality, meet compliance standards, and streamline operations.

Originally launched as a Business Process Management (BPM) platform, Intellect evolved in response to customer needs—transforming into a flexible Quality Management System (QMS) that helps businesses in industries like discrete manufacturing and life sciences automate.

Built on a powerful BPM foundation, Intellect's QMS enables companies to reduce risk, simplify audits, accelerate compliance with industry regulations, and scale operations with confidence.

Intellect's Adaptable QMS Platform Solves Rigidity of Legacy

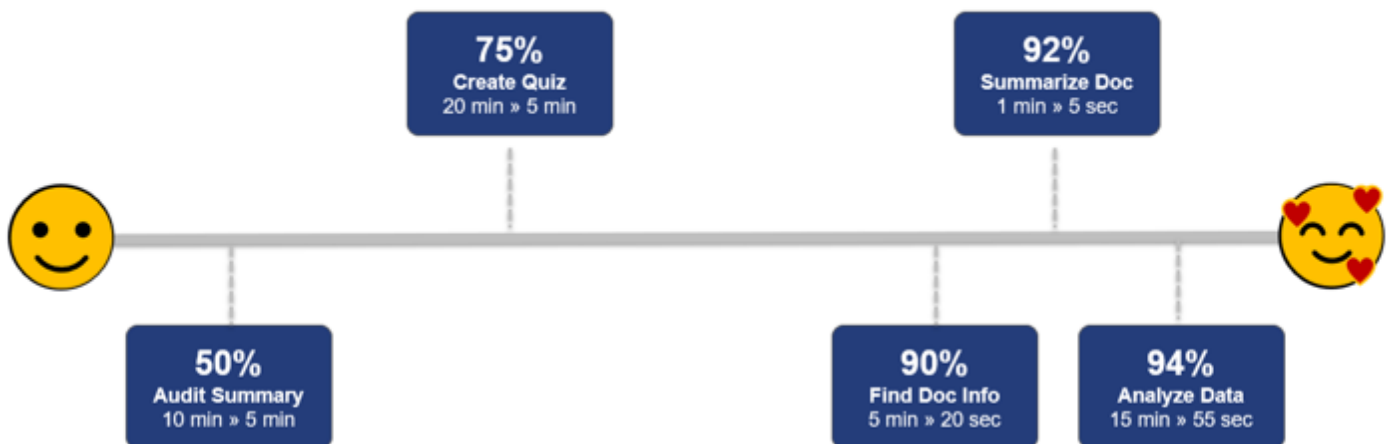

Intellect has solved the rigidity of legacy QMS platforms by combining AI-powered intelligence, and enterprise-grade security in one unified solution. This means faster deployments, easier configurations, and real ROI—without sacrificing compliance.

Leading Organizations Choose Intellect QMS AI for Smart Analysis

AI-Powered Efficiency

Intellect QMS AI aids workers in making better decisions, propose root cause analysis, and dive into their data with even more clarity with our Smart Analysis tool.

Users of Intellect QMS AI have experienced remarkable efficiency improvements ranging from 50% to 90%+.

Built-In Risk & Compliance Connectivity

Maintain audit readiness for ISO and FDA to reduce risk with connected quality applications that drive compliance across your entire operation.

ISO Compliance

As an ISO-certified company, Intellect understands the rigorous demands of international standards. Intellect's quality management solution is purpose-built to help organizations implement, maintain, and continuously improve their ISO 9001, ISO 13485, and other ISO-compliant processes. Also, the platform is fully validated out of the box, enabling regulated organizations—specializing in life sciences and medical devices—to deploy with confidence and meet compliance requirements from day one.

Adaptable Platform

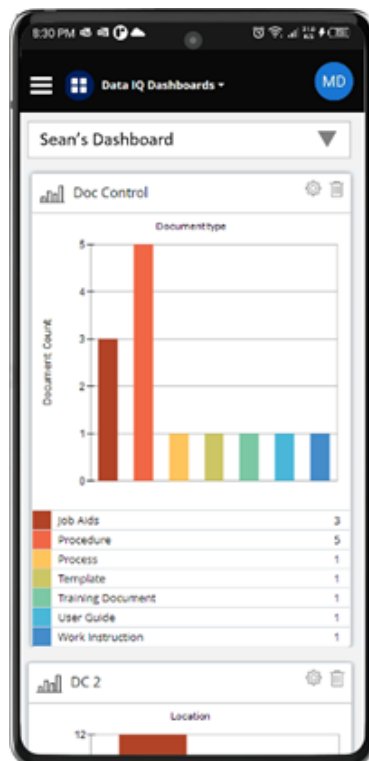

Modify workflows, build apps, and scale your solution without writing a line of code. Need to add a new step in the workflow based on previous information? No problem, use the drag-and drop editor to make changes and keep your teams in control.

Connected Systems, Unified Insights

Intellect QMS AI integrates seamlessly with ERP, MES, and BI tools like Power BI and Tableau. Real-time data sharing enables faster decisions, stronger cross-team collaboration, and greater visibility.

Real-Time Mobile Quality Control

Intellect's new mobile application allows users to make updates seamlessly through Native iOS and Android phones and tablets

Perform audits anytime, anywhere

Empower teams on the go with mobile access for audits, CAPAs, inspections, and approvals. Offline capabilities ensure uninterrupted workflows in the field or on the factory floor.

- **Interactive Dashboards via Data IQ** – View real-time metrics and analytics from anywhere
- **Intellect AI Support** – Leverage Smart Analysis and GenAI features for on-the-go insights and recommendations
- **Search IQ Integration** – Instantly find and access indexed documents using mobile search
- **Offline Mode** – Work without internet, then sync once reconnected
- **Photo and File Uploads** – Capture evidence in real-time using your device's camera or file system

Maintain audit readiness for ISO and FDA approvals

Reduce risk with connected quality applications that drive compliance across your entire operation.

Accelerate ROI with Intelligent Automation

Benefits

What you Gain

Rapid Deployment

Get up and running—Without waiting on IT

Reduced Downtime & Scrap

Insights help you act before issues impact operations

Audit Readiness

Stay compliant all year round with a unified quality system

Continuous Improvement

Real-time feedback loops drive long-term process gains

Scalability

Easily expand across departments, sites, or global operations

Enterprise-Grade Security & Infrastructure

- Hosted on **AWS USA** or **AWS EU** (offer on-prem, too).
- **Compliant encryption** and infrastructure
- Supports **global scalability**, mobile access with offline use

Unlock the Future of Quality Management

Intellect QMS AI isn't just a system—it's your partner in digital transformation. With built-in intelligence, unmatched flexibility, and proven results, Intellect helps you stay ahead of change, reduce risk, and lead with quality.
